LinkedIn: [linkedin.com/in/lemuel-mukorode](https://www.linkedin.com/in/lemuel-mukorode)

PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with 4+ years of experience building scalable web applications and delivering exceptional user experiences. Proven expertise in JavaScript, React.js, Node.js, PHP, and database management. Reduced page load times by 35% through MySQL optimization and increased user engagement by 40% through innovative interface design. Strong problem-solver with demonstrated ability to collaborate across teams, implement RESTful APIs, and deploy secure, high-performance web solutions.

TECHNICAL SKILLS

Front-End Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Bootstrap, Tailwind, jQuery, AJAX, Responsive Web Design, Media Queries

Back-End Development: Node.js, PHP, Python, Laravel, RESTful API Development, Server-Side Scripting

Databases: PostgreSQL, MySQL, MongoDB, Database Design and Management

App Development: Flutter

Tools & Technologies: Git, GitHub, JSON, API Integration, Cross-Platform Optimization, Figma

UI/UX Design: Wireframing, Prototyping, User Interface Development, User Experience Design

Soft Skills: Team Collaboration, Problem-Solving, Time Management, Attention to Detail, Strong Communication

PROFESSIONAL EXPERIENCE

Full Stack Web Developer I ReadSermons

Remote | October 2024 – Present

- Developed comprehensive sermon repository platform using Laravel framework and MySQL database
- Implemented user authentication, content management system, and search functionality
- Built dynamic content delivery system allowing users to browse, search, and access sermon collections
- Created responsive design using Laravel Blade templates and modern CSS frameworks
- Integrated third-party APIs for enhanced functionality and content enrichment
- Optimized application performance through efficient query design and caching strategies

Full Stack Web Developer I Cliquefare

Remote | July 2025 – Present

- Architected and developed full-stack ride-sharing platform using React.js, Node.js, and PostgreSQL
- Designed scalable database schema in PostgreSQL to handle user profiles, ride requests, and real-time booking data
- Built responsive front-end interface with React.js, ensuring seamless user experience across all devices
- Implemented RESTful API endpoints for ride booking, user authentication, and payment processing

- Developed real-time features for ride tracking and driver-passenger communication
- Optimized database queries and API responses, improving application performance by 45%

Full Stack Web Developer | Sheepdata

Remote | April 2024 – Present

- Designed and developed interactive web interfaces, increasing user engagement by 40% through improved UI/UX implementation
- Created comprehensive unit tests ensuring 95% error reduction before deployment to production environments
- Developed and maintained web applications using HTML5, CSS3, JavaScript, React.js, Node.js, and PHP
- Built responsive designs optimized for multiple screen sizes and devices using media queries and modern CSS frameworks
- Established secure server infrastructure by implementing security protocols, automated backups, and monitoring systems
- Led team in establishing coding standards and collaborative workflows, improving project delivery efficiency
- Utilized AJAX technology to dynamically load content without page refreshes, enhancing user experience
- Performed thorough code reviews to identify and resolve potential issues before production deployment
- Troubleshoot and resolved bugs in production code efficiently, minimizing downtime and maintaining application stability

Back-End Developer | DYEN

Warri, Delta State, Nigeria | August 2023 – Present

- Engineered scalable database architectures supporting dynamic web applications and high-traffic websites
- Designed and implemented RESTful APIs for mobile and web applications with JSON data exchange
- Automated backend processes, boosting operational efficiency by 20% and reducing manual intervention

- Integrated third-party services into existing applications using API calls, expanding functionality
- Collaborated with UI/UX designers to create intuitive user interfaces aligned with business requirements
- Utilized AJAX for dynamic content loading, improving page performance and user satisfaction
- Managed source control systems using Git to ensure proper version control and team collaboration
- Developed and maintained web applications using HTML, CSS, JavaScript, React, Node.js, and PHP

Full Stack Web Developer I Netgrity

Warri, Delta State, Nigeria | October 2023 – February 2024

- Developed responsive web applications using HTML5, CSS3, JavaScript, Bootstrap, and PHP
- Optimized MySQL queries, reducing page load times by 35% for high-traffic websites
- Managed source control systems using Git to ensure seamless versioning and code integrity
- Researched and integrated emerging technologies to enhance existing applications and create innovative solutions
- Utilized AJAX technology for dynamic content loading, improving user experience and site performance
- Implemented responsive design principles across various devices using media queries and flexible layouts

EDUCATION

Computer Science Diploma

Delta State University, Abraka | October 2025 – 2026

Bachelor of Science in Geophysics

Federal University of Petroleum Resources, Effurun, Delta State | October 2018 – 2024

Senior Secondary School Certificate

Delta Steel Technical High School, Aladja | 2012 – 2018

First School Leaving Certificate

Staff Nursery and Primary School, Federal Government College, Warri | 2006 – 2012

PROFESSIONAL CERTIFICATIONS

- **Product Design Certification** – DYEN, 2023
 - **Digital Marketing Certification** – DYEN, 2024
-

KEY PROJECTS

Cliquefare - Advertising-and-Earning-Platform

Technologies: React.js, Node.js, PostgreSQL, RESTful APIs

- Developed full-stack advertising application with extensive functionality for advertisers, earners, marketers and affiliates to upload, engage, market and refer tasks.
- Implemented secure user authentication and payment processing system
- Built scalable PostgreSQL database architecture handling thousands of concurrent adverts and task requests
- Created responsive UI optimized for both advertisers, earners, marketers and admins across all devices

ReadSermons - Sermon Repository Platform

Technologies: Laravel, Livewire, Tailwind, MySQL, Blade Templates, RESTful APIs

- Built comprehensive content management system for sermon archives and delivery
- Implemented advanced search functionality and content categorization
- Developed user authentication system and role-based access control

- Optimized database queries for fast content retrieval and improved user experience

Nettalez - Novel Website

Technologies: PHP, MySQL, HTML5, CSS3, JavaScript

- Designed and developed custom novel website with dynamic content management
- Implemented responsive design ensuring optimal viewing across all devices
- Created admin panel for easy content updates and site management
- Integrated contact forms and business inquiry systems

Celomart Ecommerce

Technologies: React.js, Node.js, MySQL, RESTful APIs, Payment Gateway Integration

- Designed and developed full-featured shopping platform with real-time inventory management system
- Implemented secure payment integration using third-party payment gateways
- Built responsive front-end interface optimized for desktop, tablet, and mobile devices
- Created admin dashboard for product management, order tracking, and analytics

Personal Portfolio Website

Technologies: Next.js, HTML5, CSS3, JavaScript, Responsive Design

- Developed and deployed personal portfolio website showcasing technical projects and skills
- Implemented modern UI/UX design principles with smooth animations and transitions
- Hosted at lemuel.sihkertechonologies.online with optimized performance and SEO
